ENVIRONMENTAL AND SUSTAINABILITY POLICY

Corporate Self-Declaration of Commitment to Environmental Protection

Document	Company Self-Declaration	Rev. 00
Data	September 8, 2026	Approval: Management

F.I.MA.L. S.r.l., aware of its responsibility toward the environment and the territory in which it operates, intends to integrate sustainability into its decisions and into its activities of designing, manufacturing, installing, servicing, and marketing machinery for woodworking and panel processing.
This Environmental Policy constitutes a self-declaration of commitment by Management. It does not constitute a management system certification and does not refer to standards or certifications not held by the company.

1. Compliance with Environmental Legislation

- Operate in compliance with environmental laws and regulations applicable to our activities.
- Maintain constant attention to relevant environmental obligations and take the necessary actions to prevent violations.

2. Pollution Prevention and Continuous Improvement

- Prevent, to the extent reasonably possible, pollution arising from our activities.
- Identify opportunities to improve processes, equipment, and operating practices in order to reduce environmental impacts.
- Consider relevant environmental aspects when making investment decisions and modifying processes.

3. Efficient Use of Resources

- Promote the responsible use of energy, raw materials, water, and other materials used in company activities.
- Reduce consumption and waste through more efficient process management and, where sustainable, the adoption of lower-impact technologies and solutions.
- Promote proper maintenance and equipment efficiency to avoid unnecessary consumption and losses.

4. Waste and Materials

- Reduce waste generation at source whenever technically possible.
- Promote the proper collection, separation, management, and recovery of materials, prioritizing recovery over disposal whenever technically and economically sustainable.
- Pay particular attention to the proper management of waste subject to specific legal requirements.
- Reduce, where possible, unnecessary packaging and promote reusable or recyclable solutions.

5. Energy, Emissions, and Climate Change

- Monitor and, where possible, reduce energy consumption associated with company activities.
- Evaluate solutions to improve the energy efficiency of facilities, buildings, and production processes.
- Progressively promote technologies and operating practices that contribute to reducing emissions and the carbon footprint.
- Evaluate, where practically applicable, the use of lower-impact energy sources.

6. Product Design and Life Cycle

- Consider, wherever possible, energy efficiency, durability, maintenance, and the possibility of replacing or recovering components in the design and development of machinery.
- Promote solutions that enable customers to use machinery efficiently and safely, reducing material waste and unnecessary processing.
- Promote the availability of spare parts and service activities aimed at extending the useful life of machinery.

7. People, Suppliers, and Awareness

- Promote a culture of environmental responsibility among employees and collaborators through information, awareness, and good operating practices.
- Encourage, where possible, suppliers and partners to adopt practices consistent with the principles of environmental protection.
- Foster cooperation with business stakeholders to identify practical opportunities to reduce environmental impacts.

8. Objectives and Review

- Gradually define realistic environmental objectives consistent with our activities and available resources.
- Periodically review progress achieved and identify any further improvement actions.
- Review this Environmental Policy whenever significant changes occur in activities, processes, or the applicable regulatory framework.

F.I.MA.L. S.r.l. Management confirms its commitment to considering environmental protection not as a formal requirement, but as an integral part of responsible company management.
